

First Destination Survey for 2022 / 2023 Undergraduates:

Office of Career and Life Planning

The First Destination Survey, and subsequent research, captures the successes of our most recent alumni during their first year after graduation. We are so inspired by their accomplishments. Many are even driven to take part in multiple opportunities including both continuing education and employment.

Throughout it all, New England College alumni are incredibly willing to give back, mentor, and lend advice to current students. Career and Life Planning, under the Office of Advancement, is also proud to offer our alumni continued support as they embark on their ongoing adventures.
